What is caGrid?

caGrid plays a central role in caBIG?. caGrid provides connectivity among institutions, thereby allowing research groups to tap into the rich collection of emerging research data while supporting their individual investigations. When using caGrid, institutions manage and securely share information and analytic resources.

Please visit the following page for a high level overview of caGrid and related papers: caGrid Overview.

If you are technically inclined, please visit the following page for a more detailed technical introduction to caGrid: caGrid Technical Overview.

Frequently Asked Questions

Please visit the FAQ page.

caGrid Developer Wiki

For technical details on caGrid components, please visit the <u>caGrid developer wiki</u>.

caGrid Documentation

Visit the <u>caGrid Documentation</u> page for official caGrid documentation.
